*Your Local, Trusted  
British Columbia Partner in  
Prefabricated Steel Buildings*

---

 100% Canadian-Owned Company

 Metal and Steel Buildings  
Engineered in Canada

# WHY CHOOSE PACIFIC STEEL BUILDINGS?

At Pacific Steel Buildings, we're proud to be British Columbia's trusted, locally operated provider of custom prefabricated steel buildings. We specialize in designing, manufacturing, and constructing high-quality steel structures tailored to the unique needs of businesses across all of British Columbia and Western Canada, including Alberta and Saskatchewan.

With 20 years of expertise within the construction industry, we offer a turnkey solution for your project, handling everything from permits and engineering work to construction and final delivery. We pledge to deliver you a premium commercial-grade steel metal building, expertly manufactured in a state-of-the-art facility operated by highly skilled and qualified professionals.

When you choose Pacific Steel Buildings, you're choosing a company that understands BC's local landscape and business demands. Our team ensures a seamless process so you can step into your new building with confidence.

# BUILDING YOUR VISION WITH PRECISION AND POWER

## CLIENT-CENTRED SERVICE APPROACH

For nearly two decades, we've partnered with clients to gain a deeper understanding of both their construction needs and their ultimate objectives

---

## COMMITTED TO INNOVATIVE SOLUTIONS

We design each building to fit your unique needs, combining efficiency, innovation, and cost-effectiveness – even if it means thinking outside the box

---

## THE STANDARD FOR QUALITY AND DURABILITY

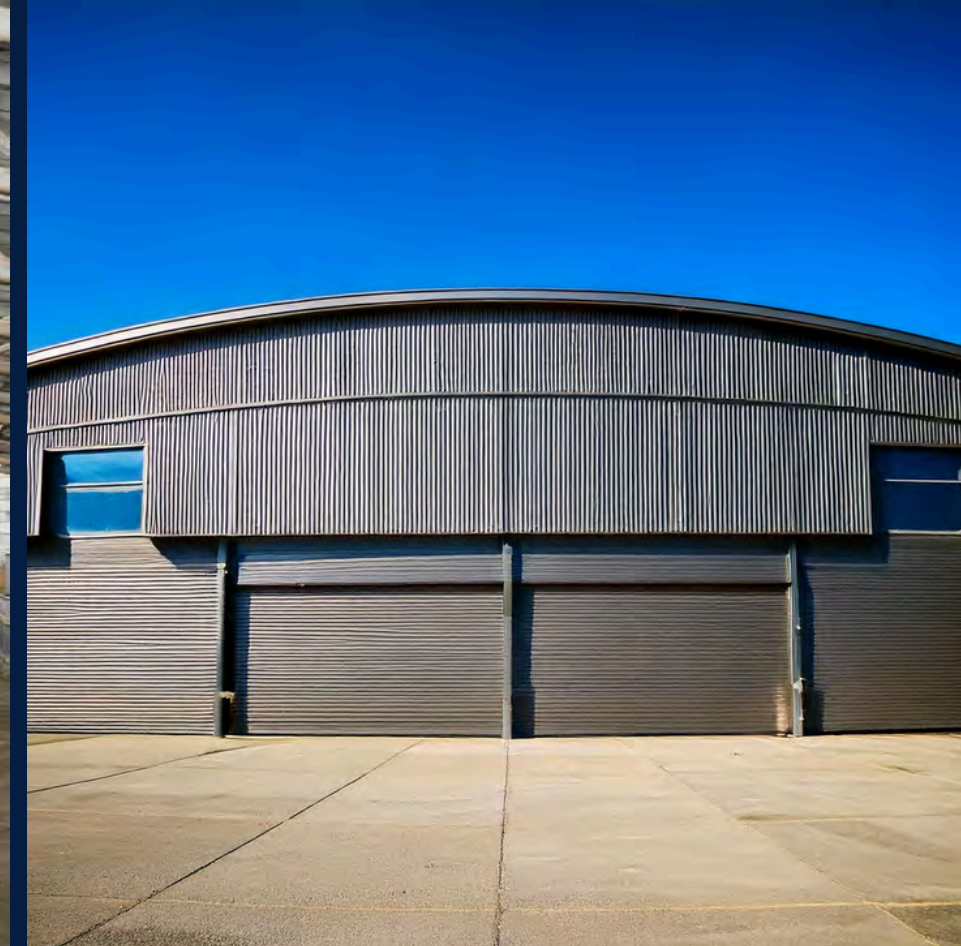

Our reputation is built on superior products. Using the finest commercial steel, we adhere strictly to all design and code requirements to ensure your project is built to last

---

# STEEL BUILDING SUPPLY & INSTALLATION SERVICES

## SIMPLIFY YOUR CONSTRUCTION PROCESS WITH PACIFIC STEEL'S FULL-SERVICE BUILDING SUPPLY AND INSTALLATION SOLUTIONS

- **Seamless Project Management:** From pre-construction planning to on-site steel building erection, we streamline every phase of your project
- **Expert Coordination:** We manage complex designs, engineering, manufacturing, and delivery, ensuring efficiency at every step
- **Dedicated Project Support:** Your dedicated project manager is available 24/7 to address your questions and provide updates from initial design through final installation
- **Professional Execution:** Rely on our experienced local crews to deliver on-time, high-quality results, backed by years of expertise in steel building installation

# TURNKEY DESIGN-BUILD SERVICES

*Choose Pacific Steel's most popular and comprehensive turnkey service for end-to-end design, supply, and construction of your custom steel building*

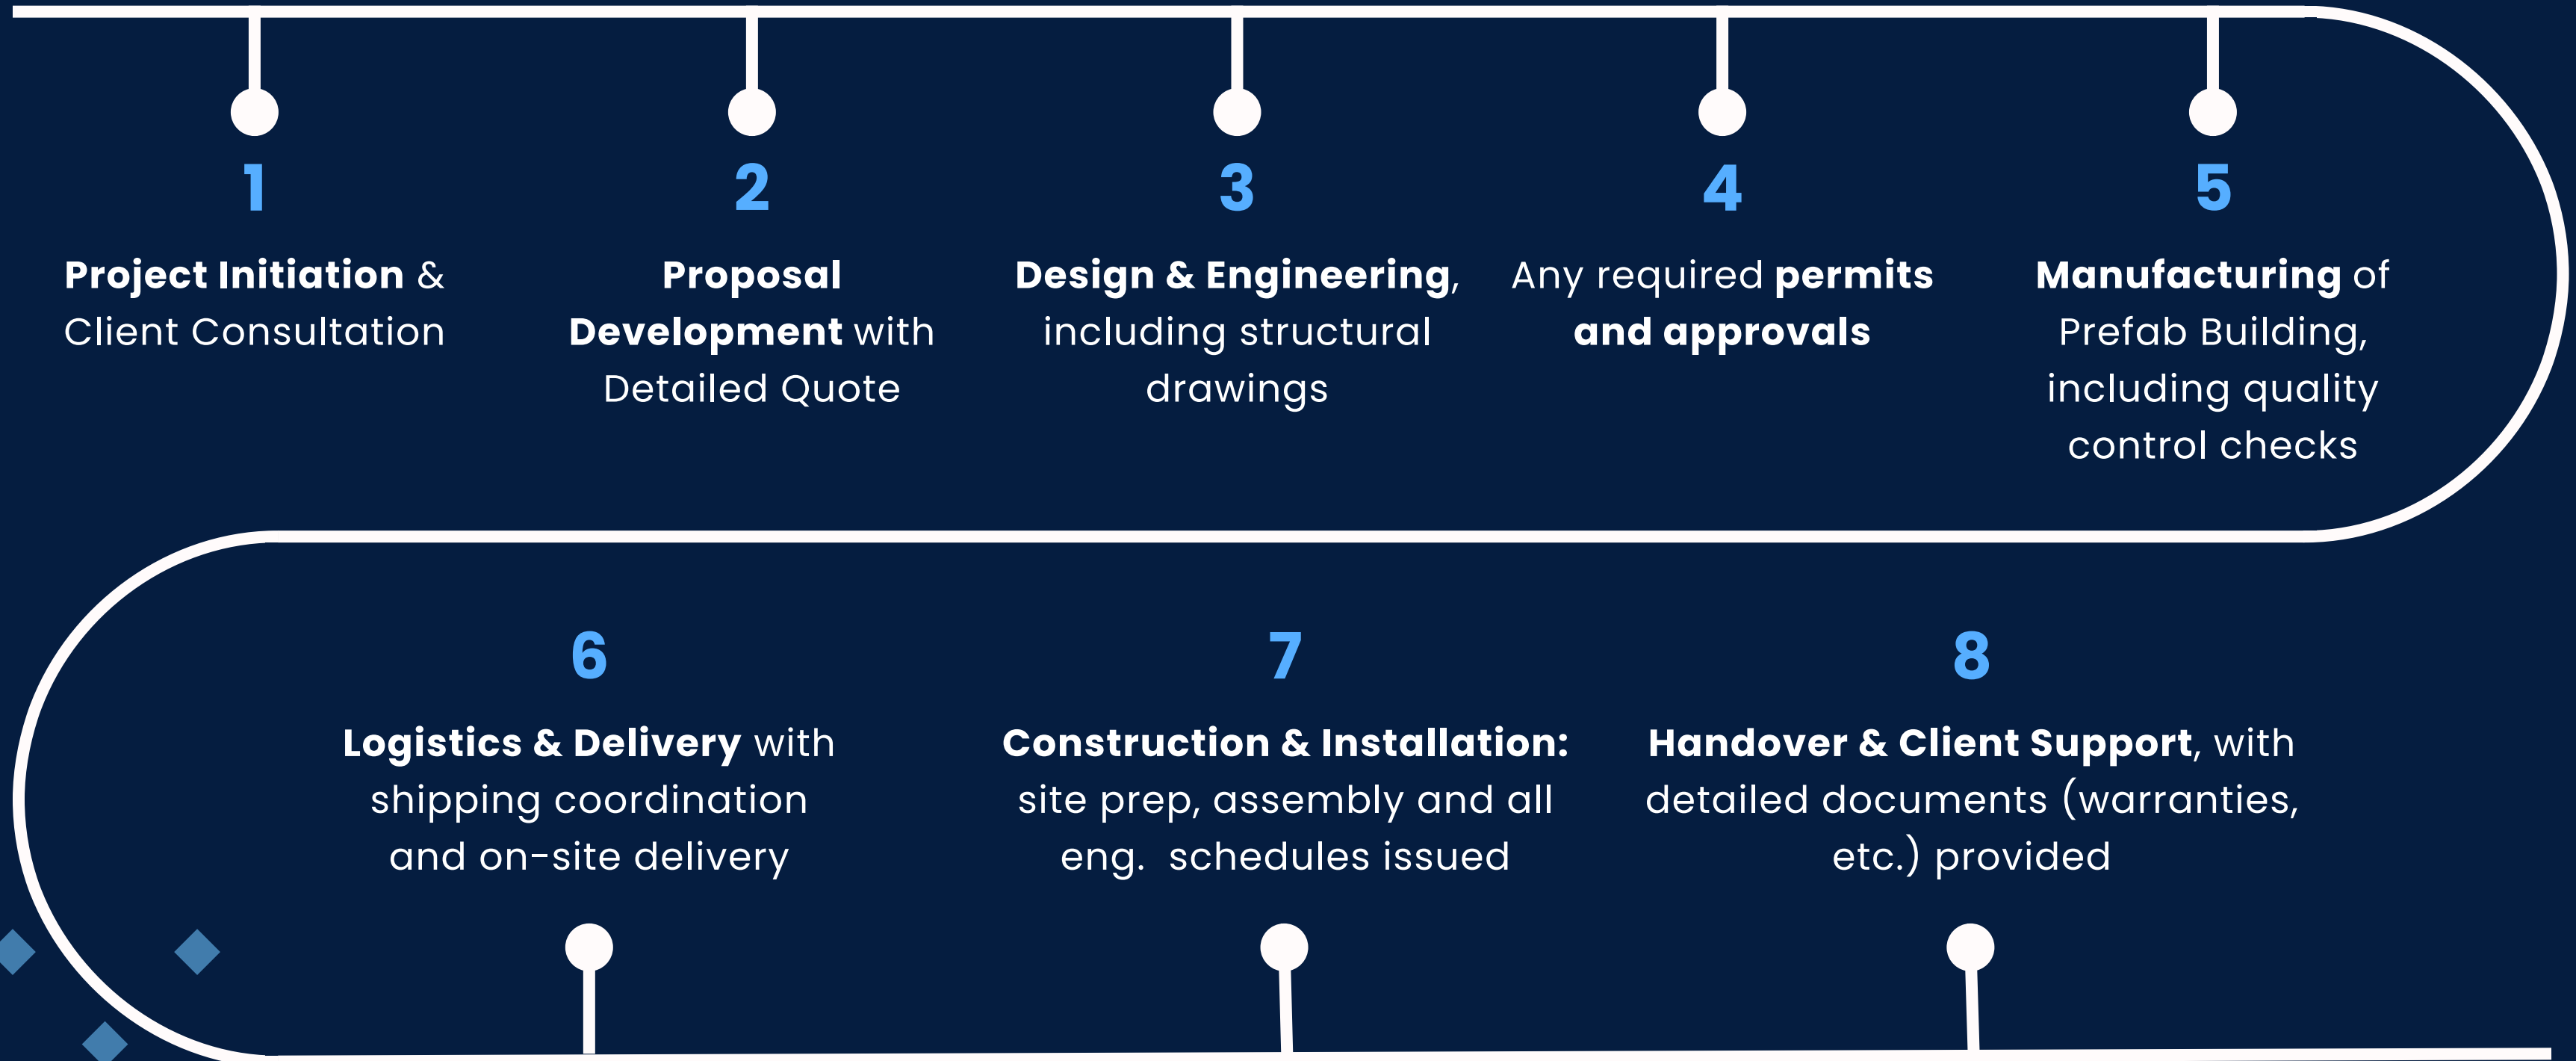

- **Complete Project Oversight:** We manage all aspects, from steel building supply to engaging architects & engineers, overseeing permitting and site preparation, laying foundations, all the way to the full installation of your steel building
- **Tailored Building Design:** We can help customize every element of your steel structure, including cladding materials, windows, doors, mezzanines, skylights, and more, including insulation and inside finishing
- **Single-Source Responsibility:** Enjoy peace of mind as we provide a streamlined process that ensures cost control, quality management, and accountability
- **Efficient and Cost-Effective:** Our design-build approach reduces change orders, accelerates timelines, and delivers significant cost savings with client input during preliminary and final designs and opportunity for early scope revisions
